Step 1: Launch the Game

- Open Steam and start Modern Warfare 2019.

Step 2: Start Sewi.exe

- When your operator appears in the Multiplayer Lobby:
- Alt+Tab out of the game and run Sewi.exe.
- Quickly Alt+Tab back into the game and wait.

Step 3: AIO Menu

- The AIO menu will pop up automatically.
- Press the Insert key to close it if needed.

Step 4: Load the Script

- Ensure you have placed the script within the **\Documents\Call of Duty Modern Warfare\scripts** folder.
- While in the lobby, press Load Scripts.

Step 5: Setup Private Match

- Open a Private Match lobby.
- Set up custom gamemode Eg, Unlimited time and score
- If you haven't yet, press Load Scripts again.
- Start the match — done!

✅ You're ready to play with your loaded scripts!
